

Mr. Ghulam Jellani

Address : Avenue d' Echallens 87, 1004, Lausanne, Switzerland

Phone : +41767637650

LinkedIn : [Ghulam Jellani](#)

Email : jellaniraja303@gmail.com

Summary:

Telecommunications professional with over 12 years of experience in wireless communications, IoT, Android smartphone testing, mobile device validation, and RF network optimization. Experienced in working with international clients and delivering high-quality testing and network performance solutions.

Experience:

Test Engineer – Wireless & Mobile Networks

Mar 2025 – Present

Marquistech Sarl (Apple Project) — Switzerland

- Perform data, voice, functional, KPI, GM, and basic sanity testing.
- Conduct network and chipset validation, including LTE-CA, VoLTE, 5G NR, and VoNR performance testing.
- Execute user-centric test cases, emergency call testing, and application testing.
- Perform initial log analysis, defect reporting, and Radar management.
- Test iOS devices to ensure software quality and cross-device compatibility.
- Validate LTE FDD bands, 5G NR Carrier Aggregation (CA), and EN-DC component carriers.
- Verify throughput and voice quality under different software builds.
- Analyze map performance under various network conditions.
- Perform testing on different baseband and RF units for throughput, coverage, and performance.
- Monitor and analyze network and field KPIs.
- Conduct laboratory testing and troubleshooting of degraded KPIs.

Tools: ATLAS, Bambi Viewer, QXDM, iOS Toolbox, NFA, Purple-4, PlotPro, 5G Train, XCAL, Wave, Radar

5G Field Verification Engineer

May 2023 - Oct 2024

Nokia, Finland

- Performed field verification testing for LTE and 5G NR technologies, including DL/UL throughput, interference analysis, VoNR MOS, and ping testing.
- Conducted log analysis and prepared technical reports.
- Implemented configuration changes on network sites.
- Performed chipset testing on Qualcomm and MediaTek platforms.
- Managed various trunk-related activities and JIRA tasks.

Device Test Engineer

Oct 2021 – Oct 2022

HUAWEI, Saudi Arabia

- Managed 5G and 4G device testing and firmware verification.
- Performed compatibility testing and data speed validation on live networks.
- Conducted CPE software upgrades, SIM lock, PIN lock, and cell lock testing.
- Obtained certification and technical acceptance from clients including STC, Zain, and Mobily.

- Tested new features on FWA devices, smartphones, and IoT products.
- Performed application testing and quality assurance activities.
- Executed field and stationary beta testing projects.
- Conducted reporting and initial log analysis with R&D teams.
- Managed testing activities for 5G/4G FWA (CPE), MiFi devices, routers, IoT devices, and smartphones.
- Performed LTE FDD band validation and 5G NR CA / EN-DC carrier testing.
- Conducted stability testing and IPv4/IPv6 dual-stack validation.
- Executed technical acceptance testing on tablets and smartphones.

Test Engineer

Aug 2020 – Oct 2021

Marquis Technologies, Saudi Arabia

- Conducted pre-launch mobile device, handset, chipset, and prototype testing.
- Performed field, sanity, feature, functional, system, compatibility, regression, performance, load, and stress testing.
- Executed mobility and stationary testing for 2G, 3G, 4G LTE, VoLTE, and VoWiFi smartphones.
- Managed device acquisition and software flashing activities.
- Conducted network testing, FT, NW, and CBS testing on Nokia and Motorola devices.
- Performed cell selection, reselection, and handover testing.
- Validated VoLTE handovers between FDD and TDD networks.
- Executed CS and PS inter-RAT handover testing.
- Performed Wi-Fi hotspot and tethering validation.
- Conducted navigation testing and special field test cases across Saudi Arabia.
- Executed chipset and NB-IoT testing on MediaTek platforms.
- Performed CBS testing according to CITC requirements.
- Conducted UI, integration, regression, and network testing.
- Evaluated device performance under various network conditions, including Out-of-Service (OOS), preferred band selection, and network capability scenarios.
- Performed voice and data inter-RAT testing.
- Executed intra-frequency and inter-band 4G PS handover and redirection testing.
- Coordinated CBS certification approval with clients.

4G Radio Network Optimizer

Dec 2016- Dec 2019

ZTE, Pakistan

- Conducted weekly zero-traffic cell analysis and escalated issues according to NPM contract requirements.
- Monitored LTE KPIs, including ERAB setup success rate, RRC setup success rate, CSFB preparation success rate, and cell throughput.
- Established KPI benchmarks for network optimization activities and operational maintenance.
- Managed drive testing on VIP routes and handled customer complaints.
- Performed new feature testing, parameter trials, and benchmarking activities.
- Monitored OSS KPIs and maintained network performance targets.
- Analyzed accessibility, retainability, mobility, and throughput KPIs.
- Investigated paging discard rates, resource block utilization, and cell availability metrics.

Assistant Manager LTE RF-Optimization Engineer

Mar 2011- Dec 2016

Etisalat(PTCL), Pakistan

- Monitored network KPIs including accessibility, mobility, interference, and service performance.
- Performed complete cluster optimization using hard and soft parameter tuning.
- Conducted interference scanning activities for LTE deployment.
- Managed drive testing on VIP routes and addressed customer complaints.
- Executed feature testing, parameter trials, and benchmarking activities.
- Performed single site verification of LTE eNodeBs after network rollout.
- Conducted detailed LTE drive test log analysis to identify root causes of network issues.
- Recommended parameter optimization solutions to improve network performance.
- Performed KPI analysis during LTE pre-launch testing across major cities.
- Validated LTE features including ICIC, Event-Based ANR, and fallback handovers to EVDO networks.

Tools: GENEX PROBE & ASSISTANT, NEMO OUTDOOR & ANALYZER for Optimization and ATOLL for planning & analysis of LTE

Technical Skills

- **Wireless Technologies** : GSM ,WCDMA , LTE , LTE-Advanced ,5G NR ,VoLTE ,VoWiFi ,VoNR, RCS ,NB-IoT
- **Testing & Optimization** : Mobile Device Testing , Network Validation , RF Optimization , Drive Testing ,KPI Monitoring , Log Analysis ,Performance Benchmarking ,Troubleshooting
- **Tools** :QXDM , HiDS , XCAL , ATLAS , PlotPro , Wave , NFA , Purple-4 , Bambi Viewer , iOS Toolbox , Radar , ATOLL , GENEX Probe , GENEX Assistant , NEMO Outdoor , NEMO Analyzer
- **Programming** : C , C++ , Python

Education:

Master's in Wireless Communication and RF Systems
Tampere University - Finland

AUG 2022 - DEC 2024

BE-Telecommunication Engineering
NUML University - Islamabad, Pakistan

JUNE 2006 - AUG 2010
